01 / SUMMARY

Senior Full-Stack JavaScript Developer with 8+ years of commercial experience building enterprise and business web applications. Experienced in designing REST APIs and database schemas using Node.js, NestJS, TypeORM and PostgreSQL, and in scalable frontend architecture with Angular, React, TypeScript and modern frontend technologies. Led frontend teams, mentored junior developers and drove architectural decisions. Hands-on with React Native (Expo), Next.js, Redux, NgRx, Docker, CI/CD and unit testing, actively applying AI-assisted development workflows to accelerate delivery.

02 / SKILLS

BACKEND & DATA	Node.js, NestJS, TypeORM, PostgreSQL, REST APIs, Swagger/OpenAPI, WebSockets, Firebase (Firestore, Cloud Functions)
FRONTEND	Angular, React, Next.js, React Native (Expo), Ionic, TypeScript, JavaScript, RxJS, NgRx, Redux, Context API, PrimeNG, Angular Material, HTML, CSS/SASS
TOOLS & PRACTICES	Nx monorepo, Docker, CI/CD (Bitbucket Pipelines), Git, Jest, React Testing Library, Keycloak, Stripe, PayPal, Twilio, Google Maps API, code review, mentoring, AI-assisted development

03 / EXPERIENCE

Full-Stack JavaScript Developer MYREINHAUSEN

[NOV 2021 — JUL 2026]

- Owned both frontend and backend development of the customer platform, including application architecture, feature delivery, technical decisions, code quality and UI consistency.
- Designed and developed REST APIs using Node.js, NestJS and TypeORM: controllers, services, DTOs with validation (class-validator), guards, interceptors and centralized error handling.
- Designed the PostgreSQL database schema: created and maintained TypeORM entities and relations, wrote database migrations and optimized queries (indexes, pagination, eliminating N+1 problems).
- Implemented server-side authentication and authorization with Keycloak: JWT validation, role-based guards and endpoint protection, aligned with roles and permissions on the frontend.
- Implemented server-side Excel and PDF report generation with configurable data sources and export endpoints consumed by the frontend reporting modules.
- Documented APIs with Swagger/OpenAPI to keep a clear contract between backend and frontend.
- Structured the codebase in an Nx monorepo with shared libraries for types and DTOs reused across frontend and backend, ensuring end-to-end type safety.
- Set up and maintained Docker-based local development environments (docker-compose with PostgreSQL) used across the team.
- Developed and maintained the customer portal frontend using Angular, TypeScript, RxJS, NgRx and PrimeNG: complex business workflows, reactive forms, reporting modules and role-based interfaces.

- Discussed and drove architectural decisions with the team on API design, data flow, page structure and component design; mentored intern and junior developers through code reviews and pair programming.
- When requirements were incomplete, approached features from the end user's perspective, proactively proposed and implemented functionality that improved usability and closed gaps in specifications.
- Improved maintainability by refactoring legacy code on both backend and frontend, reducing duplicated logic and improving data handling; contributed to unit testing with Jest.

Lead Frontend Developer / JavaScript Developer

[APR 2021 — NOV 2021]

PROCODERS

- Acted as the lead frontend developer of the team: planned and delegated tasks, reviewed code and coordinated feature delivery across developers.
- Built an e-commerce platform for a client from Portugal using Angular and NgRx: product catalog with fetching and displaying goods, shopping cart, checkout and payments, discount system and Telegram order notifications; integrated Firebase, Google APIs and Google Maps.
- Integrated payment providers Stripe and PayPal, and authentication with Google and Facebook Login.
- Developed an admin panel for managing products and orders, with change logs for tracking modifications and user roles for access control.
- Delivered the same e-commerce application as a mobile app on Ionic and prepared and deployed iOS and Android builds to the App Store and Google Play.
- Built a Glovo-like delivery application with live order tracking, estimated delivery time and real-time courier tracking on the map.
- Built and maintained Firebase Cloud Functions on Node.js, including notifications, e-mail sending, barcode scanning support and backend automation.
- Set up and integrated CI/CD pipelines on Bitbucket to automate builds and deployments.

JavaScript Developer

[SEP 2019 — APR 2021]

DARLY SOLUTIONS

Developed and maintained business applications across four projects, building reusable UI components, dashboards, account management modules, complex forms, role-based access control and file uploads.

- **Advertising platform** (React, TypeScript): account and advertising campaign creation, budget management, complex multi-step forms, state management with Context API and hooks, REST API integration.
- **Logistics mobile app for the US market** (React Native, Redux, JavaScript): cargo management workflows, vehicle selection functionality, API and WebSocket integrations.
- **Travel agency platform** (Next.js, TypeScript): tour search and filtering, booking flow, user registration and authentication, server-side rendered pages, forms with Context API and hooks, REST API integration and component testing with Jest and React Testing Library.
- **Platform for sports organizations** (Angular): creation and management of sports clubs, chats and SMS via Twilio API, real-time notifications over WebSockets, comments module and REST API integrations.

Front-end Web Developer

[MAR 2018 — MAY 2019]

BONUM STUDIO

Developed responsive and cross-browser websites using HTML, CSS/SASS, Bootstrap, JavaScript and jQuery.

HTML · CSS/SASS · BOOTSTRAP · JAVASCRIPT · JQUERY

04 / PROJECTS

Noveshex Fitness Platform

[]

PERSONAL FULL-STACK PROJECT

- Developing a full-stack fitness mobile application using React Native (Expo) and TypeScript.
- Designing frontend architecture, reusable UI components and a scalable application structure.
- Implementing nutrition tracking, workout programs, coaching modules and user management functionality.
- Using AI-assisted development workflows to improve productivity and accelerate feature delivery.
